## DETAILED ACTION

### *Election/Restrictions*

The Election and the amendment filed on 12/23/05 have been entered.

Claim 11 is missing. Also, there are two claims 16, the first one is directed to an apparatus, and the second one is directed to a method of making a memory device.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, 12-16 (the first one), 17 and 19, drawn to a structure of an MRAM, classified in class 365, subclass 158.
- II. Claims 16 (the second one), 18 and 20, drawn to a method of making an MRAM, classified in class 438, subclass 3.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the MRAM in Group I could be made by a different process other than generating heat of etching process as claimed in claims 16, 18 and 20.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
